

TIMELESS ELEGANT – MATCHING EVERY TREND

The beautifully designed frames of the housing and the attractive cable suspension system open up several possibilities of operation. It is suitable for effective visualisation of commercials or as design object for interior decoration e.g. in entrance halls, bars, or restaurants.

Create striking moods or effective advertising.

The LIGHT BOX is available as TFT-Screen with CF card reader and integrated speakers or as a back-lighted plastic film display. Combination of both designs allows a scope of creativity for your advertising message. It is possible to arrange plastic film displays above, beside and underneath the TFT displaying additional permanent information whereas the screen is showing your commercials.
